

What is Coolstreaming Livecast?

CS Livecast is the home for broadcasting yourself

- Watch thousands of channels and personal tvs
- Become a cool producer using your creativity
- Chat to live broadcaster in real time
- Enhance your website/blog embedding your productions
- Do the best videoconferences using your connection

CSLIVE FEATURES

Watch other's productions

Watch other's channels selecting them by category, language or time zone, explore thousands more, and chat with other discerning viewers about your channel content.

Broadcast yourself and your favourite media

Start your own live broadcast sharing content from around the web, from your video cards or webcam, and assemble a team of producers.

Embed channel in your site/blog

Spread your channel all over the internet by embedding it on your site/blog or other web profile, and do the best!

The producers will have total control of their content:

- Video quality settings
- Number of watchers
- Channel protection (with password)
- Live chat

while end-users can:

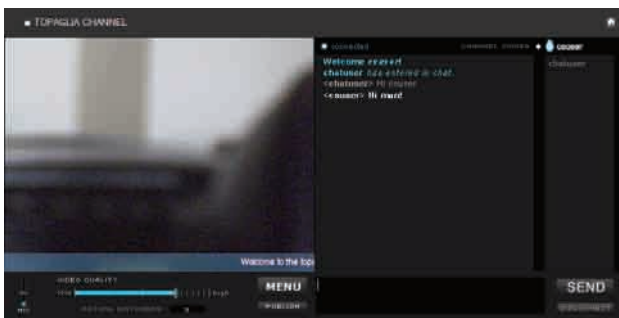

- Change console color for a perfect embed
- Advanced search engine (with more criteria than ever)
- Chat with producers and other end-users
